bin/ACE with balanced vs SVD final sweep (30 modes, threshold 1e-6, identical intermediate sweeps)
truncation error
(vs. same calculation, no final target)
total error
(vs. tighter PT, threshold 3e-7)
total error
(vs. exact solution)
mixed family
RMS error of ⟨O⟩(t)
pure dephasing
RMS error of ⟨O⟩(t)
final bond dimension m
final bond dimension m
final bond dimension m
plain ACE: SVD final sweep to m, held-out
balanced final sweep to m (η=0.3), held-out
plain ACE: SVD final sweep to m, OOD
balanced final sweep to m (η=0.3), OOD
untruncated calculation (base; solid held-out, dotted OOD)
